The Honorable Mark M. Mailo  
President  
Chuuk State Senate  
13<sup>th</sup> Chuuk State Legislature

The Honorable Innocente I. Oneisom  
Speaker  
Chuuk State House of Representatives  
13<sup>th</sup> Chuuk State Legislature

Gentlemen:

I am very pleased to sign your Act No. 13-21 into our new Chuuk State Law No. 13-16-16 which provides for comprehensive protection of our state's fisheries resources. This Act is a milestone in our state's environmental and resources conservation effort. It puts us in line with national and international focus for the protection of our world resources and environment, while also providing for balanced management of our resources for local demand and customary practices. I have signed the law, based on these considerations, but I also want to point out a few areas in the law where I would urge the Legislature's continued consideration and improvement.

The first areas is the need for reasonable balance between our state regulatory and conservation authorities set forth in section 7 through 10, and sections 12 and 14 through 23, and the reef owners' natural right to use and enjoy their marine lands. As you know, in constitutional jurisprudence, a significant government restriction on a person's property rights could result in inverse condemnation litigations. I alert our relevant state authorities to that area of potential tensions for continued attention and improvement.

One possible solution to such potential disagreement with the reef or marine land owners is perhaps to revise the law to provide for sharing of the fines under sections 34 and 35 and the proceeds from forfeited properties under section 27 and 32, so that the marine land owners are reasonably compensated for such trespasses onto their lands. I urge the Legislature to give attention to my suggestions.

Sincerely,

Johnson S. Elimo  
Governor

**AN ACT**

To protect the coastal fisheries resources of the State of Chuuk, and for other purposes.

**Be it enacted by the Chuuk State Legislature:**

1           Section 1. Findings and Intent. The Legislature finds that the living resources  
2           that inhabit the reefs and territorial sea of Chuuk are quickly being depleted. Reports  
3           from local fishermen and from our local conservation organizations confirm that reef fish  
4           and other living resources require greater protection in order to ensure their continued  
5           survival for the benefit of current and future generations. While Chuuk has its own  
6           important traditional conservation techniques that are recognized by courts and

8           are required in order to safeguard the natural heritage of the islands of Chuuk.
